DISPLAYS SHOWROOMS

ABOUT US

TEK Arredamenti viene fondata nel 1977 su iniziativa di alcune persone già inserite nel settore della ceramica con esperienza di marketing e si colloca proprio nel cuore del distretto ceramico sassolese; da qui sicuramente sarà più facile proporsi e spaziare in tutto il mondo, confermandosi poi negli anni leader nella fabbricazione di mobili espositori per piastrelle, legni, marmi e nella progettazione di arredamenti per sale mostra ceramiche, arredo-bagno e componenti in genere legati a questi settori, ottenendo con professionalità innumerevoli successi e importanti risultati. “La soddisfazione dei clienti è sempre stata il carburante che ha alimentato la macchina della nostra azienda”. Oggi, a trentasei anni dalla fondazione, permangono la stessa moderna vocazione alla ricerca, all’innovazione, al design e la stessa voglia di proporre soluzioni nuove per un mercato in continuo rinnovamento, offrendo un coordinamento tecnico progettuale e produttivo altamente preparato e qualificato. Dal servizio commerciale in rapporto costante con le imprese, allo studio tecnico di analisi, progettazione e layout, operante nella definizione estetico - funzionale degli ambienti in una sintesi sempre più stretta fra architettura ed elementi di arredo, all’organizzazione produttiva per tecniche di lavorazione dei materiali, montaggio e assistenza post-vendita. Attualmente TEK Arredamenti ha inoltre ampliato il proprio organismo per la rete di imprese nel gruppo associato Nekto, a garantire la qualità dei prodotti e dei servizi con un modello di business contemporaneo e innovativo. In tutto questo TEK è un’azienda costantemente al presente, il suo passato e le premesse del suo successo sono in ciò che è oggi: “e poi siamo molto più bravi a creare sistemi espositivi e showroom che a scrivere testi”.

ABOUT US

Tek Arredamenti was founded in 1977, by a group of people already involved in the ceramic field with experience in marketing. It is based in Sassuolo, in the heart of the ceramic district. This location has allowed it to become world renowned, a leading company in the production of displays for tiles, wood, marble and in the design of showrooms, bathroom furniture and linked components. “Customer satisfaction has always been the fuel that powered our company”.

Today, 36 years after the founding of the company, we still have the same dedication to research and innovation, still the same desire to find new solutions for a market in constant renewal, and still offer highly qualified technical, project and manufacturing coordination. We simultaneously offer a commercial service providing constant connection with companies; a technical studio of analysis, design and layout, who works on the aesthetic-functional definition of the space unifying architecture and furniture elements; and a productive organization of processing techniques of materials, assembling and after-sales assistance. Moreover, recently Tek Arredamenti expanded its organization and helped form an associated network of companies called Nekto to guarantee the quality of its products and services in a modern and innovative business model. In conclusion, Tek Arredamenti is a company always aware and focused on the present. Its past and its success reveal what it is now...and... we must confess that we are much better at creating displays systems and showrooms than writing.

PROGETTAZIONE

Albert Einstein disse:

"La mente che si apre ad una nuova idea non torna mai alla dimensione precedente."

Creatività significa per noi scoprire nuove forme espositive, scoprire nuovi sistemi funzionali, che siano una sintesi tra design e funzione.

I nostri progetti vengono realizzati con uno stile che non passa inosservato e neanche di moda.

TEK ha elaborato un metodo di analisi accurata.

Analizzare significa per noi ascoltare, valutare ogni singolo elemento di un progetto: funzione, estetica, ergonomia, economia, durata.

È la somma delle parti che rende unico ogni nostro progetto. Questo tipo di attenzione qualifica poi il nostro servizio, flessibile e puntuale.

PROJECT

Albert Einstein said: *"A mind that opens up to a new idea never goes back to the previous dimension."* For us, creativity means discovering new forms of display, discovering new functional systems that are a synthesis of design and function; our products are made in a style that never goes unnoticed and never goes out of fashion.

TEK has devised a careful analysis method. For us, analysing means listening, evaluating every single element of a project: function, aesthetic appeal, ergonomics, price and durability. It is the sum of the parts that makes our project unique. This type of attention to detail also distinguishes our service, which is flexible and customised.

PRODUZIONE

Produrre è la messa in opera. La nostra filiera produttiva cura tutte le fasi di realizzazione, dalle materie prime selezionate, ai materiali, alle finiture.

Fino al montaggio, eseguito con rigore e precisione dal nostro personale qualificato.

Pezzo dopo pezzo il vostro progetto si compone, è un quadro fatto di tessere, un mosaico che ha come missione la creazione di arredamenti e soluzioni espositive sempre attuali.

La collaborazione è per noi un valore aggiunto, cooperare per gli stessi obiettivi, la condivisione di problematiche è per noi la sfida a cercare nuove strade.

L'interfaccia tecnica e operativa costante con i nostri clienti ci aiuta a raggiungere risultati che soddisfano i nostri clienti.

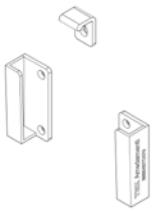

Da oltre 35 anni.

PRODUCTION

Producing is implementing. Our production department looks after all production stages, from the selected raw materials, to the materials, to the finishes. Right up to assembly, which is carried out with painstaking precision by our highly skilled workforce. Your project is made up piece after piece, it is a picture made up of pieces of a mosaic whose mission is to create furnishings and display solutions that are always relevant. For us, collaboration is an added value, cooperating to achieve the same goals; sharing tasks is a spur for us to explore new avenues.

Constant technical and operational interfacing with our customers has helped us to ensure customer satisfaction. For more than 35 years.

FLESSIBILE ED EFFICACE
PER CAMPIONI

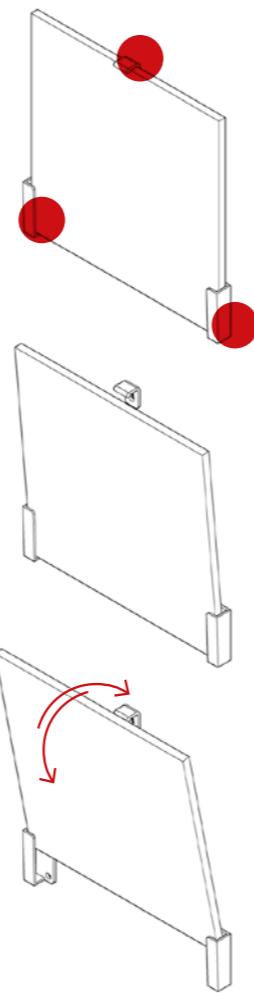

Click Clack... evoluzione del sinottico.

Mai come oggi essere posizionati bene nei punti vendita è di vitale importanza e sappiamo che anche Voi avete dato sicuramente il massimo perché questo possa avvenire con i mezzi più all'avanguardia a disposizione. Noi da anni, con il nostro lavoro, cerchiamo di capire come sarebbe giusto intervenire per far sì che ci sia più manualità, più contatto tra il materiale in mostra e l'acquirente, senza con questo trasformare, come succede spesso, la sala in un "campo di battaglia" per le innumerevoli cartelle di tipologie e misure diverse sparse ovunque. Abbiamo anche osservato a lungo come lavorano oggi gli espositori con pannelli sinottici, sia per esporre pavimenti che rivestimenti e ci siamo resi conto che non risultano sufficientemente esplicativi e che limitano i rivenditori togliendo loro la possibilità di prendere in mano il singolo campione di prodotto ed esibirlo a terra o in altre angolazioni per vederne l'effetto desiderato. Tutto questo ha consentito l'idea di creare il sistema "Click Clack", che costituisce uno strumento di lavoro flessibile ed efficace per gli addetti alla presentazione e vendita dei manufatti in modo da renderli disponibili ai potenziali clienti per apprezzarne a pieno le caratteristiche strutturali e cromatiche valutandone anche possibili accostamenti. Inoltre, il sistema consente di sostituire i campioni in caso di danneggiamento o modifiche apportate agli stessi, ovvero di riallestire integralmente il pannello senza sostituire il supporto stesso.

and 2 side hooks

FLEXIBLE AND EFFECTIVE
BUSINESS TOOL FOR
SAMPLES

Click Clack... evolution of synoptic.

Today more than ever it's very important to be well positioned in the stores and we know that you also have definitely given up because this could happen using the most advanced available. For several years, with our job, we try to understand how it would be right to intervene to ensure that there is more manual, more contact between the material in the exhibition and the buyer, without, with this, as often happens transform the showroom into a "battlefield", with the many samples scattered everywhere. We also observed a long time, the way in which today are used exhibitors with synoptic panels, to show wall and floor tiles, we realized that they are not sufficiently explanatory and they're limiting the retailers taking away their ability to take hold of the single sample of the product, show it on the ground or at any angle in order to see the desired effect. All this has allowed the idea to create the "Click - Clack" system, a working tool flexible and efficient for those involved in the presentation and sale of artifacts, to make them available to potential customers in order to appreciate fully the structural and chromatic characteristics and also assess the possible combinations. Furthermore, the system allows to replace the samples in case of damage or changes to the same, or to re-arrange the full panel without replacing the support itself.

FREESTYLE E BRICK

NELLA PUREZZA DELLE FORME,
NELLA PERFEZIONE DELLE LINEE, BRICK RISPONDE A CRITERI DI ELEGANZA E
LEGGEREZZA. IN QUALSIASI TIPOLOGIA DI AMBIENTE E POSIZIONE,
LA SUA VESTIBILITÀ NON HA OSTACOLI. LA STRUTTURA PERMETTE UN TELAIO
ESPOSITIVO FRONTALE FISSO PER IMMAGINE GRAFICA, BRAND O RIVESTIMENTO A
TEMA. INOLTRE, SI CONTRADDISTINGUE PER LA SUA INTERESSANTE PREDISPOSIZIONE
AD ESSERE TAMPONATO E INSERITO A SCOMPARSA NELLE FODERE IN CARTONGESSO
O ALTRO RAGGIUNGENDO COSÌ UN MINIMALISMO ESTETICO DI ALTO VALORE. ESSO SI
MIMETIZZA E SI VALORIZZA NEL PROGETTO CON UNA CAPIENZA ESPOSITIVA ILLIMITATA
E PRODUTTIVA.

WITH ITS PURE SHAPES
AND PERFECT LINES, BRICK MEETS THE REQUISITES FOR ELEGANCE AND LIGHTNESS.
ITS ADAPTABILITY IS UNLIMITED WHATEVER THE INTENDED SETTING OR POSITION. ITS
STRUCTURE CAN BE ASSEMBLED WITH A FIXED, FRONT-FACING DISPLAY FRAME TO
ACCOMMODATE GRAPHIC IMAGES, A BRAND OR THEMED COVERINGS.
IT ALSO STANDS OUT FOR THE INTERESTING OPTION OF FITTING AN INFILL COVER STRIP
OR BEING FITTED AS A PULL-OUT FIXTURE IN PLASTERBOARD OR SIMILAR MATERIALS
TO ACHIEVE THAT HIGHLY-PRIZED MINIMALIST LOOK.
IT BLENDS IN WITH PROJECTS, GIVING THEM ADDED VALUE WITH UNLIMITED DISPLAY-
AND PRODUCTION CAPACITY.

NOTE IMPORTANTI - IMPORTANT NOTES

- Verificare attentamente la portata dei piani prima di posizionare l'espositore. La ditta produttrice non risponde di eventuali danni a persone o a cose qualora si verificasse negligenza nei controlli.
- Le dimensioni e le caratteristiche tecniche degli espositori sono indicative e soggette a modifiche, quindi non impegnative.

IMBALLI | Gli espositori sono protetti per la spedizione su paletta con termoretraibile, che garantisce una protezione minima ma sufficiente al mobile. Gli imballi sono da conteggiare a parte nel caso di gabbie, casse in legno o cartoni.

VERNICIATURA | Le parti in metallo sono rivestite con vernici a polvere termoindurente. I colori di serie dei mobili espositori sono: bianco, nero, semilucido, nero metallizzato, antracite antiraffigio, canna di fucile, rame invecchiato, alluminio metallizzato, grigio marmo antico, alluminio antiraffigio. Altri colori su richiesta da valutare a parte.

MONTAGGIO | Gran parte dei mobili espositori di nostra produzione arrivano a destinazione smontati e correddati di schema di motaggio.

DATI TECNICI | I nostri sistemi meccanici sono da noi studiati e garantiti per ottenere il massimo della scorrevolezza e della silenziosità. Inoltre, abbiamo alcuni sistemi brevettati per facilitare e ottimizzare il lavoro dei nostri clienti.

- Check the load-bearing capacity of floors before putting the display into position. The manufacturer is not liable for any damage or injury in case of negligence during these checks.
- The dimensions and specifications of the displays are provided for guidance only and are subject to change.

PACKING | The displays are shrink-wrapped onto a pallet for protection during shipment: this guarantees a minimum yet adequate degree of protection for the unit. The packages should be counted separately in case of crates, wooden boxes or cartons.

PAINTING | Metal parts are painted with thermo-setting powder paints. The standard colours of the displays are: white, black, semiglossy, metallic black, scratch-resistant anthracite, gunpowder grey, antique copper, metallic aluminium, antique grey marble, scratch-resistant aluminium. Other colours are available on request, subject to approval.

ASSEMBLY | The majority of the display units we make arrive disassembled at their destination and come complete with instructions for their assembly.

SPECIFICATIONS | Our mechanical systems are designed by us and guaranteed for maximum smoothness and quiet operation. We have also patented systems to facilitate and optimise the work of our customers.
